## Junior Developer

As an enthusiastic Junior Developer with a flair for crafting innovative UI/UX solutions, I bring extensive expertise in HTML, CSS, and JavaScript, complemented by specialized training in Multimedia Design focusing on web development. I learnt coding practices and laid a solid foundation through coursework in Computer Science. Graduating with Honours, I further honed my skills by developing web applications using the Angular frontend framework hosted on AWS. After University, I have gained valuable software testing experience through a trainee program. Furthering my knowledge and ever-increasing interest within the Information Technology world. I am eager to apply my diverse expertise and practical experience in my next role, explore examples of my work at [callumharding.dev](https://callumharding.dev)
